

ITSC-3155 Design Sprint

Wekjira T. Eshetu

User stories.

As a student, Robert wants to log into the website and set up virtual reality to learn practical experience. For instance, Robert wants to quickly understand some computer hardware parts, the functionality of a computer, and the parallelism of software and hardware easily by looking at the virtual reality that helps student develop their knowledge a success for their internship and a better understanding of concepts.

As an intern, Robert wants to search under the leading website for training and video lectures link that helps for specific internship and build experiences and skills efficiently besides school lessons.

As an internship seeker, Robert searches for different options from the entire list on one website.

Scenarios for Robert

Robert is a computer science student struggling with the concept of some computer courses to understand more about SQL, Parallelism, and others; to overcome this difficulty, Robert signs in to the website called WebEdu of self-learning program after knowing their major courses. They could sign in to the website and start using supplementary books, lecture videos, videos that help improve their skills, and other related materials that allow them for pre-internship training.

Robert has easily used laptops, signed in on a website web page, and used to earn practical learning experiences and build skills from watching a virtual video and understanding the concepts. Students use a smartphone, laptop, or tablet to sign in to the website and select what they want to learn or looking for; then, Robert develops skills and knowledge. Robert can still

apply for internships from the provided link list under significant websites and have pre-internships training videos.

feature list

- Feature that will allow students to upload their courses enabling them to view corresponding resources including lecture videos, course textbooks, other video resources etc.
- Feature that will allow students to filter through different internship/job opportunities for an easier application search process
- Feature that will update the course resources as necessary
- Feature that will allow students to view external web resources all on our website
- Feature that will enable students to download any necessary materials from the website onto their personal device
