

Product Goal:

The goal of WebEdu is to make online learning more convenient for students. Allowing them to access all academic resources from ample platforms (such as youtube) all in one spot, organized by class. Giving students easy access to additional resources will promote better academic success, boosting grades and GPA, helping students become more appealing to hiring companies/organizations.

Group Feature List:

Feature that will allow students to upload their courses enabling them to view corresponding resources including lecture videos, course textbooks, other video resources etc.

Feature that will allow students to filter through different internship/job opportunities for an easier application search process

Feature that will update the course resources as necessary

Feature that will allow students to view external web resources all on our website

Feature that will enable students to download any necessary materials from the website onto their personal device

Solution Sketches

- An area for students to enter their current semester classes in order to find resources specific to their course work.
 - As you can see in the image to the right, users will be able to input their course information. This will allow them to be able to find all related course material. This can be done in one of two ways, they can sign in and the information entered will be saved in a database or they can continue as a guest, but, they will need to re-enter their course

① Area for students to enter their current courses

Courses	Course #1 Name -	Signin/ login
	Subject -	Recommended Resources
Employment	Professor -	
	Section -	
Resources	Course #2 Name -	
	Subject -	
Downloads	Professor -	
	Section -	

information each time they reopen the website. To the left of the page is going to be the website directory, allowing users to switch from page to page. To the right of the page there is a section titled “Recommended Resources” which will display the top viewed resource material for that course.

- Filter allowing students to choose a specific internship/job based on their preferences/requirements
 - As you can see in the image to the right, once the user clicks on the “Employment” tab, the page that is displayed allows the user to select a specific city or state, job title, a specific company or organization, whether it is a full-time/internship/part-time. Once the user is done selecting their desired preferences, they will click the “View Result” button to display changes. These filters are not required so the webpage will display job/internships from all over.

② Filter allowing students to choose a specific internship/job based on their preferences/requirements

	Sign in / login	
Courses	Location (city/state)	Job title
Employment	Worked/ company/ organization	Job/ internship
Resources	View results	
Downloads		

- Allow students to download PDF's of their resources for convenience and easy access.
 - As you can see by the image below, once the user clicks on the “Resource” Tab, a list of all related resources will show up, if the file has an arrow in the corner, it is a downloadable file and can be saved to the users personal device

③ Allow students to download PDF's of resources for easy access

	Sign in / login			
Courses	1.pdf	2.pdf	3.pdf	4.pdf
Resources	5.pdf	6.pdf	7.pdf	8.pdf
