User Scenarios
- Makayla is a student at UNC Charlotte and is pursuing a degree in Computer Science along with a minor in Criminal Justice. Makayla is very stressed out by her course load, considering she also works 40 hours a week. Her grades are not where they should be and, as a result, she may not be considered for her dream internship this summer. In order for her to relieve some of the stress, she looks into a service called WebEdu. She finds that this service allows her to view all academic materials she can use for each of her classes so she has the necessary resources to succeed.

- Ruby is a 20 year old Junior attending UNC Charlotte currently majoring in Computer Science. To further build her resume and add some experience under her belt she is looking for an internship in the realm of website development. However, this has proven to be difficult for her as she cannot find any job opportunities. Ruby remembers that her advisor mentioned WebEdu and she decides to check it out. Using WebEdu, Ruby was able to filter through an entire database of companies currently looking for a website developer. She is able to select the job level (internship, part-time, full time), job type, etc to be able to find the perfect match for her.

- Bruce is a 5th year Computer Science student majoring in Computer Science. Bruce has a few internships and part-time positions under his belt, however, he needs help completing his graduation requirements so he is able to graduate on schedule. He remembers seeing a flyer on campus about a website called WebEdu and decides to give it a go. On WebEdu Bruce is able to log in using his student credentials, where he is then able to see his degree progress in addition to a list of classes he needs to pass in order to meet his graduation requirements and with what grade he needs to pass those classes. In addition, he is also able to see any lecture videos, textbooks, youtube videos, and any other academic resources he would need in order to pass his classes and meet graduation requirements

User Stories

- "As a college student looking for other resources that can help me succeed academically, I am looking for something that will provide credible resources in a quick convenient manner." - Makayla
- "As a college student looking to gain work experience within my field, I want something that will allow me to find the perfect job for me without all the hassle" - Ruby
- "As a college student wanting to make sure I can meet all my graduation requirements, I want something that will be accurate, easy to navigate, and clear to understand" - Bruce

Features

- Navigation bar to allow for easy access throughout the website
- Ability to login and have personal information (such as degree requirements) stored in a database for easy access and user convenience
- Filter that will allow users to be able to sift through different job/internship applications
- Feature that will update any materials as necessary
